## EXPERIENCE WITH

- HTML, CSS, JavaScript, Express.js, Node.js,
- React with Firebase + Firestore.
- M.E.R.N Stack Project.
- Ruby, Ruby on Rails.
- GitHub, Heroku, Axios.

## Projects

### DIY Grooming

*A very, VERY niche social media platform for dog care.*

- Created using React, MongoDB, Express and Node.js ( M.E.R.N ) stack.
- Front end deployed on Netlify. Server deployed on Heroku.
- User Authentication for logging in and logging out - implemented with JSON web tokens and decryption with Bcrypt.
- Users given a very dynamic form for their filling in their dog care tips:
  - Breed types
  - Adding steps
  - Image uploads
  - Commenting on posts.
  - Account Edit and delete.
- Website Link: <https://diy-grooming.netlify.app/>

### PhotoDiary

*Use it as a blog or diary.....oh and you can upload images!*

- Created using React, MongoDB, Express and Node.js ( M.E.R.N ) stack and deploy on netlify.
- Users can create can create, edit, delete each individual blogs.
- Full logging in with Email using JWT and Google OAuth.
- Pagination and Search function implemented.
- Website Link: <https://photodiary.netlify.app/>

### CryptoTracker

*Track the price of your crypto using this fast and reliable site.*

- Search function: search the coin you are looking for - either by name or symbol. Toggle with the radio.
- Created using React, styled with Material UI and Custom CSS.
- See the
- Deployed on Netlify.
- Website Link: <https://cryptopricetracker.netlify.app/>

### FridayDotCom

*A layman's free project management platform.*

- Created with React Front End and Firebase backend.
- Similar to the REAL Monday.com web service, users can create and assign projects with each other.
- Full authenticated account functionality including logging in and logging out - implemented with Firebase Auth.
- Full Create/ Edit / Delete projects and comment on the projects.
- Website Link: <https://fridaydotcom-ce5c4.web.app/>

## **MovieBox**

*A fun ruby terminal app for organising your movie collection*

- Created using Ruby ( no frame works ).
- Data is persistent by using the JSON gem.
- Movies can be edited and deleted. (Full CRUD)
- Movie names and info are validated.
- Movies can be searched and filtered.
- Github Link: <https://github.com/thangzathang/MovieBox>

## **EDUCATION**

### **Coder Academy (Melbourne)**

*Diploma of Information Technology*

*March 2021 - 2022 Jan*

- 10 Month Coding Boot Camp

- Foundation Programming, Introduction to Web, Database Systems, Discrete Mathematics, Introduction to Software Engineering.
